### *THE NEXT GENERATION OF SERVOMOTOR DESIGN.*

The all-new Sewquiet™ 4000 DC servomotor is a revolutionary design that will change the way you think about sewing motors.

While servomotors have been available for years, they have all suffered from the same shortcomings... noisy, low torque and ultimately unreliable.

With the new Sewquiet™ 4000, all that has changed. Utilizing a new PC board with true low current design, this motor performs like servomotors costing five times its price. It's time to Rethink servo.
