

G4 Steamer

Great steamer

Great price.

HEAVY ON THE FEATURES, LIGHT ON THE WALLET.

We have spent years developing our garment steamers with real world features that professionals have asked for.

Like our 1300 watt brass heating element that retains heat better, and resists mineral build-up. To reduce breakage when dropped, our PVC steam head has a wall thickness 2x thicker than the industry standard. And our unique wrap-a-round body ensures the water bottle won't fall off when the steamer is being moved.

The G4 is built tough, and costs less than you might think. For professional or home use.
