Country of origin	China

FEATURES

- .6 mm PTFE for extra long life
- Strong and light aluminum construction
- Riveted for extra strength
- Felt insert for snug fit
- Super smooth PTFE for optimum gliding

PROFESSIONAL IRONING SHOE

Our ironing shoes are made from heavy-duty aluminum with .6 mm PTFE, and are riveted for extra strength. A felt insert ensures a snug fit. The shoe provides a layer of insulation between the iron's soleplate, and the fabric.

PREVENTS SHINE

A Reliable ironing shoe reduces the temperature on the fabric, ensuring a proper finish to the material, and eliminating the risk of shine. The smooth PTFE allows the iron to glide over the fabric, making ironing easier.

Smart. Professional. Reliable. Since 1955.
