

MSK-373N/DTACK

Drapery Pleat Tacking Machine

Model	MSK-373N/DTACK
Motor	Sewquiet DC servo
Maximum sewing speed	1,445 rpm
Feed length (lengthwise)	0.25 - 6.5 mm
Feed length (crosswise)	2.5 - 6.5 mm
Needle bar stroke	48.6 mm
Needle system #	MT X 190LR #22
Lubrication	Manual
Warranty	Reliable™ 1 Year Warranty

MADE FOR DRAPERY TACKING

The new MSK-373N/DTACK has been designed specifically for use in drapery workrooms.

UP TO 3/4" THICK PLEAT

Standard chainstitch tackers simply will not sew the thickness required by drapery workrooms. Our new DTACK will, and can sew up to 3/4" pleats.

CUSTOM DESIGNED

We start with our standard, high quality, Made in Taiwan MSK-373N chainstitch tacker head. Our technicians change the needle bar so it will handle a thicker needle, and perform a range of proprietary modifications that results in a tacker that will give you the results you need.

SEWQUIET™ 4000 DC SERVOMOTOR

Behind the power to sew up to a 3/4" pleat lies our remarkable Sewquiet™ 4000 DC servomotor. The 4000 gives us the torque required for proper tacking. It also provides a quieter, cleaner environment. Surprised to hear we use a servomotor on a chainstitch tacker? You should be, because we're the only company that offers it as standard equipment.

FEATURES

- Sews up to a 3/4" pleat
- 8 or 16 stitch setting adjustment
- Complete stand includes a plywood table top, K-legs and a Sewquiet™ 4000 DC servomotor
